

GP Management Plan

Eligibility

A person who has a chronic or terminal medical condition can have a GP Management Plan (GPMP) A person with a chronic or terminal medical condition is one that has been (or is likely to be) present for six months or more : asthma, cancer, cardiovascular disease, diabetes, musculoskeletal conditions and stroke and complex care needs. A Team care arrangement can also be completed with most management plans. This gives you access to 5 allied health visits, which can be free.

What does a having a plan involve

GP assessing the patient, agreeing management goals with the patient, identifying actions to be taken by the patient, identifying treatment and ongoing services to be provided, documenting these and including a review date in the GPMP. You will see our nurse and your doctor to complete the plan.

Access to Allied Health Items

Patients who have both a GPMP (item 721) and TCAs (item 723) may be eligible for the individual allied health services on the Medicare Benefits Schedule. Similarly, residents of aged care homes Patients need to be referred by their GP for services recommended in their care plan.
